UNRIVALLED PERFORMANCE

The Mitre Ultimax is one of the most iconic footballs in professional football, renowned worldwide. The first ball to exceed 100mph, now perfectly recreated for the elite level of the modern game. Engineered for maximum power and precision, this Mitre Ultimax Range is the most advanced Ultimax range ever created - built and designed for the elite level of football.

Drawing on over 30 years of Ultimax expertise, this new generation introduces a refined six-panel construction inspired by the original Ultimax, combined with cutting-edge performance technology. Every ball in the range is meticulously engineered to deliver superior flight, accuracy and durability, even at the highest speeds of the modern game.

At the core of the range is Mitre's latest innovation suite. HyperFoam cushioning has been enhanced to deliver a more responsive feel, cleaner strikes and increased power, while HyperFlow groove technology disrupts airflow like a golf ball to reduce drag and improve aerodynamic performance. HyperSeal thermally bonded seams ensure next-to-zero water absorption, preserving shape and consistency in all weather conditions.
